ACS GCI Pharmaceutical Roundtable Green and Sustainable Chemistry Assessment Tools

AUTHORS

David CONSTABLE / ACS GREEN CHEMISTRY INSTITUTE, 1155 16TH ST N.W., WASHINGTON, D.C.

PURPOSE OF THE ABSTRACT

The ACS GCI Pharmaceutical Roundtable is an industrial collaboration composed of over 40 companies in the Pharmaceutical value chain. The Pharmaceutical industry is without peer in the implementation of green and sustainable chemistry and in its 17 year history of pre-competitive collaboration, with 24 active focus areas and more than 350 people actively participating in the work of the RT. One of the major achievements of the roundtable has been the creation of a suite of tools to assess and benchmark progress in green and sustainable chemistry. This talk will provide an overview of these tools and how they are being applied within member companies.
